Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This application is in condition for allowance except for the following formal matters:

IN THE DRAWING:

- The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: reference number 505 on Figure 5. A proposed drawing correction, corrected drawings, or amendment to the specification to add the reference sign(s) in the description, are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

IN THE SPECIFICATION:

- On page 6, line 10, the application serial number of the co-pending application should be provided.

Allowable Subject Matter

Claims 1-18 are allowable over the prior art of record because none of the prior art whether taken singularly or in combination, especially when these limitations are considered within the specific combination claimed, to teach: a magneto-resistive memory array comprising: a plurality of serpentine bit lines, among others as claimed in independent claim 1, each disposed adjacent to the memory cells in one row of the array such that current flowing in the serpentine bit line passes in first and second, different direction for adjacent memory cells in

Art Unit: 2818

the row; a plurality of memory cells, among others as claimed in independent claim 13, wherein memory cell in each row is paired with another memory cell in the same row such that the pair of memory cells are driven to first and second, different states by applying a single set of signals; means of setting a pair of complementary values, among others as claimed in independent claim 15, for a selected data bit in the means for storing using the same signals to store each of the complementary values in the pair of complementary value. Method for storing/reading comprising step of driving word line and serpentine bit line with first and second currents, respectively, and among others as claimed in independent claim 7; driving serpentine bit line associated with first and second memory cells with a second current such that the first and second cells, located on opposite sides of a sense point of a sense line, are set to opposite states to store the data, and among others as claimed in independent claim 10.

Conclusion

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Nakajima et al. (6,473,336) disclose a magnetic memory device comprising first and second tunnel junction portion.
